MELANIE PUTNAM  
EDITOR

WINTER 1995  
ISSUE NO. 36

TO THE MEMBERS

CHERYL M. PAINE, PRESIDENT  
MOUNT UNION COLLEGE

Happy St. Patrick's Day!

As I write this, the date is actually a little earlier than March 17. This is my attempt at being organized. But, I was just talking to the people at OHIONET who have finalized the agenda for their April 3 meeting on accessing electronic government information and March 17 already sounds as if the date has come and gone.

In this edition of the newsletter we are including information about the meeting sponsored by OHIONET. It looks like a good program. I hope that the word gets spread how easy the process can be once everything is set up. As I "surf the net" in our MAC lab, I am finding more and more government agency sponsored information and wonder at what point we will change from government documents depository libraries to government access libraries. Or, has this already happened?

Two sites on the internet I have found to be most interesting are lengthy lists relating to libraries. The first is called Library WWW Servers. Sorry I do not have the URL for it. But that is the given name and a citation search should find it. It lists well over 200 college and university library servers, of course, library related businesses such as OCLC, RLG, Innovative Interfaces, etc. Servers are international in scope. I just checked some Swedish servers and found "library humor" - fortunately, in English. The second site, I do not have a specific name, but the URL is (it's a really long one) <http://www.mit.edu:8001/people/cdemello/univ.html>. This site lists over 1000 colleges and universities which have WWW home pages. Wouldn't it be great if there was a home page listing just government document depository libraries?

Also, the February issue of Wilson Library Bulletin (1995, p. 59-60) has a really good article authored by Lee Ratzan called "Uncle Sam on the Net".

Nani Ball still sounds positive about a joint meeting in May with some other state groups. As soon as she has the details we'll let you know.

## FROM THE EDITOR:

As I am preparing for a presentation about government information available on internet gophers, a debate is raging on law-lib (the Law Librarian's listserv) about the death of Gopher (software and sites). The Yale Law Library announced its new gopher (gopher.law.yale.edu). One of the next messages that appeared on the list stated that gophers were dead; why spend the time bringing up a gopher when most sites are bringing up World Wide Web capable sites? The answers were terrific. One thread of thought to consider is that all libraries are not at the same technical level. This is very true in the world of depository libraries. Gophers are not dead. They are still very accessible, and in fact they are very much available on the World Wide Web. The skills one acquires in searching the Internet using character based software can be applied later to the hypertext world of the Web, such as creating bookmarks.

Even though I am a full-fledged user of the World Wide Web, there are reasons to turn to the non-graphical Internet still. Electronic Bulletin Boards are another source of information that fall into this category. There are many ways to access the same information and depending on your institution, you have to work with what you have. Our job continues to expand as the types of resources expand. We have to keep up with this rapidly changing environment, yet keep our hands on the paper resources. The old methods have not died either. We find ourselves in the middle of it all, where we may inform our administrators about the new technology, thus bringing an institution up to date. Or we may teach students or colleagues about new sources in relation to paper sources. The basic types of information have not changed, (i.e. laws, bills, statistics, regulations, reports) but the ways to obtain it have evolved. We can teach our patrons, students and ourselves to be critical users of these different forms of information.

CONTACT THE EDITOR AT: The Ohio State University, College of Law Library, 55 W. 12th Ave., Columbus, OH, 43210;  
(614)-292-9470; putnam.7@osu.edu

### OHIO GODORT OFFICERS (Term of office: June 1994 - May 1995)

#### PRESIDENT

**Cheryl Paine**  
Mount Union College  
Library  
Alliance, Ohio 44601  
Phone: (216) 823-3844  
1-800-992-6682 ext 3842  
FAX (216) 821-0425

#### PROGRAM CHAIR/PRESIDENT ELECT

**Nani Ball**  
Gardner-Harvey Library  
Miami University Middletown  
Middletown, Ohio 45042  
Phone: (513) 424-4444 ext. 293  
E-Mail: nball@mlavx3.mid.muohio.edu

#### SECRETARY/TREASURER

**Megan Mitchell**  
Reference Dept.  
Oberlin College Library  
Oberlin, Ohio  
Phone: (216) 775-8285  
E-Mail:  
Megan\_Mitchell@qmgate.cc.  
oberlin.edu

## FedWorld -- one of the best Bulletin Boards

FedWorld, produced by NTIS (National Technical Information Service), provides a Gateway to many free Federal Bulletin Boards. The following is a list of bulletin boards that can be reached via FedWorld's "Gateway" choice on the main menu. There are many ways to reach this system. The different addresses for the varied modes of access are:

**Telephone Access:**

DATA: (703)-321-8020; VOICE: (703)-487-4608;

**Telnet Address:**

TELNET FEDWORLD.GOV or 192.239.92.201

**FTP Access**

ftp ftp.fedworld.gov.

**World Wide Web:**

http://www.fedworld.gov

List from FedWorld as of 3/95; choose [G], then [1]. These are the actual screens captured from FedWorld:

---

Bruce Maxwell's new book, How to Access the Government's Electronic Bulletin Boards (CQ, 1995) is an excellent guide to using the bulletin boards on FedWorld. He states:

"FedWorld is a marvel, a shining example of how vast quantities of federal government information can be made available to the public electronically. It offers a gateway to more than 100 other federal BBs, documents from the White House, lists of federal job openings, images [...], and a whole lot more. FedWorld is by far the biggest and best federal government BBS ..."

His criteria for including bulletin boards in his book were the following:

- 1) it had to be accessible with a computer and modem
- 2) it had to be available to the public
- 3) it had to be free
- 4) it had to be federal government oriented, operated or funded.

In his introduction he defines a traditional BBS in the most broad of terms:

"Most of the systems described are traditional BBSs with information you can download and messaging features, but a few are not. They're with databases or dial-up systems that can provide a stream of information."

FOR SURVIVAL

## The Mother-of-all BBS Systems

The World Wide Web address for the "Mother-of-All Bulletin Boards" is: [Http://www.cs.colorado.edu/homes/mcbryan/public\\_html/bb/summary.html](http://www.cs.colorado.edu/homes/mcbryan/public_html/bb/summary.html) (Note: there is an "underscore" between public and html - no spaces).

The site is a collection of World Wide Web Home Pages for many different areas, including the commercial, government and educational locales. Some of the categories are: companies, universities, research centers, government agencies (state, federal and international), research projects and many other items. To find the links to our federal government, choose the topic: Government Agencies.

A new title The Federal Internet Source issued its inaugural Fall 1994 compilation of federal government internet sites, including a description of each site. It is published by The National Journal, Inc. and NetWeek, Inc. Call 1-800-424-2921 for more information. Individual copies are \$18.95.

**Gateways to GPO Access**  
**- Connections and Contacts -**  
(as of February 13, 1995)

1. COIN - the Columbia (Mo.) Online Information Network (SWAIS)  
Telnet to 128.206.1.3, dial (314) 884-7000

Login as GUEST; from the main menu select choice 5, "Government Center." From the resulting menu, select GPO Access.

User Support: Marilyn McLeod (314) 443-3161, or <mmcleod@bigcat.missouri.edu>

Technical Contact: Jim Newton (314) 882-2000, or <jim@more.net>

2. Seattle Public Library (SWAIS)

Dial 206-386-4140, or telnet to 198.137.188.2.

Login as "library" - all lower case, no quotes. Select VT100, and answer the terminal emulation questions. Select "Internet" off both the first and second menus. From the gateways menu, select GPO Access.

User Support: Patrick Grace (206) 386-4139

Technical Contact: Jim Taylor (206) 386-4169, or <jtaylor@spl.lib.wa.us>

3. Georgia Southern University (SWAIS)

Telnet to gsvms2.cc.gasou.edu, or dial into GSnet (9600 baud) at (912) 681-0005. Modem settings are 8 data bits, no parity, 1 stop bit; terminal emulation is VT100. To obtain the GSnet prompt, press <enter> twice. From the GSnet prompt, enter this command to reach the host GSU computer: connect gsvms2.

Users with slower modems (1200 baud) may dial into PeachNet, the computer network of the University System of Georgia at (912) 681-0500. From the PeachNet prompt, enter this command to reach the host GSU computer: connect gsvms2.cc.gasou.edu.

(Note: All four periods in the command are significant, including the final one.)

Once connected with gsvms2, public users should enter INFO as their username. No password is required. From the Public Information Services menu select Government Printing Office Access.

User Support: Lynn Walshak (912) 681-5032, or <soliblw@gsvms2.cc.gasou.edu>

Technical Contact: David Ewing (912) 681-5364, or <dewing@gasou.edu>

4. SLED - Alaska's Statewide Library Electronic Doorway (SWAIS)

Telnet to sled.alaska.edu. Users within Alaska may dial into SLED via the AlaskaNet node nearest their city or village or, for questions, dial 1 (800) 478-4667. Modem settings are 8 data bits, full duplex, no parity, 1 stop bit; terminal emulation is VT100. Once connected with SLED, press the return key to continue; at the SLED main menu, choose Government Information (#5), enter; then choose Federal Government Information (#2), enter; then choose GPO Access under Federal Government Information (#4).

User Support: Debbie Kalvie <ffdhk@aurora.alaska.edu>

5. Penn State University's Library Information Access System (LIAS) (SWAIS)

Telnet to LIAS.psu.edu. Dial into LIAS at (814) 865-5427, at 300-14.4 baud. Modem settings are 8 data bits, full duplex, no parity, 1 stop bit; terminal emulation is VT100. Once connected with LIAS, press the enter key, and then respond to the prompts for terminal emulation. When prompted for a "Penn State ID Number," press the enter key. No password is required. The LIAS Welcome Screen will appear. From there type SELECT to go to the selection menu, and then choose "GPO Access." An extensive help message is available by typing "help GPO" at the LIAS prompt. Please note: a limited number of simultaneous connections is available on GPO Access. If all connections are in use, you'll be told to "try again later."

User Support: Debora Cheney (814) 863-1345, or  
<dlc@psulias.psu.edu>

6. University of North Carolina-Chapel Hill Libraries.

(Formal announcement soon - WAIS client using Lynx world wide web browser with html files as menus) Telnet to unclib.lib.unc.edu. Dial in (300-14.4 baud) at (919) 962-9911. Modem settings are 8 data bits, full duplex, no parity, 1 stop bit; terminal emulation is VT100.

Once connected, the user is prompted to enter the system by typing "library" at the username prompt. There is no password. Users of GPO Access should select option 2- Government Databases and option 2 again for GPO Access.

User Support: Ridley Kessler (919) 962-1151, or  
<kessler.davis@mhs.unc.edu>

Technical contact: Derek Rodriguez (919) 962-1301, or  
<darodrig@gibbs.oit.unc.edu>

\*\*\*\*\*

Inquiries about the availability of GPO Access services should be directed to the Access User Support Team at (202) 512-1530, or Internet e-mail <help@eids05.eids.gpo.gov>
